The Tomb Raider franchise, which started as a video game and then became a successful film series starring Angelina Jolie as the iconic Lara Croft character, is the inspiration for this online slots game. The game is can be found at any of the many online casinos owned by Microgaming but, because it is powered by their software which they lease to a number of other casino sites, there is also a decent chance that you will find it at one which is not actually owned by them. Thanks to a combination of the enduring appeal of the Lara Croft character and the quality of the game itself, it has become a longstanding favourite of online slots enthusiasts.

The Tomb Raider game is a five-reel slot found in <http://www.luckynuggetcasino.com/au/online-pokies/> and it's very easy to play – even by the standards of slots games, which are generally considered the easiest form of online gambling for those who are not experienced. The game has a number of really appealing extras for those playing it, including a free spins feature and bonus game, as well as a Scatter Symbol (the Lara Croft symbol) and a Wild Symbol (the official Tomb Raider logo). It can be played using a variety of different coin denominations, ensuring that no-one should have to bet a higher denomination than they are comfortable using over the course of the whole nights gaming – after all, this adds up over the course of an entire evening!

The bonus round for this game is activated when the player scores a minimum of three 'Golden Idol' symbols in any one payline, and this takes you to the next stage, where you will be confronted with a screen full of these 'Golden Idol' symbols. You then have to pick the same number of them that appeared in the previous payline, with each one guaranteeing you a prize. The other major additional feature in this game is the free spins bonus, which can entitle you to up to ten free spins.
